**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 9-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 9 limits "changing a state of the chamfering portion in the simulation based on the lens shape of the eyeglass lens". The examiner could not find this limitation, or similar, in the specification. This rejection will be withdrawn on evidence that such is in the specification (page and line indicated, and if not expressly disclosed, a comparison of the claim language with the specification disclosure).

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 9-11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP 2002-126985, cited by applicant, (English language equivalent US 6,688,944). As set forth in the previous Office action, '985, see English language equivalent '944, for example figure 10, discloses the claimed invention, including a method for processing a chamfering of an eyeglass lens, including, inputting a width of a chamfering and a range of the chamfering from a periphery of a lens shape of the eyeglass lens to from a V-shaped portion, displaying information of the lens shape and a content of the chamfering to carry out a simulation processing of the lens based on input matters, controlling the chamfering of the posterior refracting surface, and changing a state of a chamfering portion in the simulation based on the lens shape. Please see '944, column 11, line 54 through column 13, line 51. The chamfering is simulated, based on the input of a chamfering width and a range of chamfering, a state of the chamfering changed in the simulation based on the lens shape. While '944 does not use the term "simulation", by entering the data, and using the data to predetermine the chamfering of the lens, '944 in fact performs a chamfering simulation.

***Response to Arguments***

6. Applicant's arguments with respect to claims 9-11 have been considered but are moot in view of the new ground(s) of rejection. Please refer to the rejection above. Applicant states that '985 does not disclose the invention as now claimed. The examiner disagrees, as set forth in the rejection above.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
